

JLPT Preparation Model Study Plan (for N5, 4, 3, and 2)

The graph below illustrates a vacation free **twice a week study model** (90 minutes on lesson and 90 minutes on homework). Studying in five days a week instead of two may not necessarily increase the speed of study by 2.5 times. It all depends on each individual's Japanese level while it is also time consuming for one to establish its proficiency in grammar and vocabulary.

Regarding the N4 course, this book will be used instead of BP3. This will be determined based on the student's Japanese level and study schedule.
